DAY 1

On day 1, this 81 year old female was admitted with multiple dermal ulcers, diarrhea (8-10 stools daily), and a Foley catheter for urinary incontinence, 8x10 inches of perianal skin was red and raw from fecal erosion. Treatment with Calmoseptine® Ointment was started.

DAY 3

By day 3, the patient was less agitated and more comfortable. A 1x3 inch reddened area around the anus was all that remained. Diarrhea continued, but with the use of Calmoseptine® Ointment applied twice daily, healing took place rapidly.

Although this patient's urinary incontinence was controlled by a catheter, she experienced intermittent diarrhea over the next 15 months. The use of Calmoseptine® Ointment prevented skin breakdown.

Case study by Odette Birth, RN, CETN

DIRECTIONS

1. Cleanse skin gently with mild skin cleanser. Pat dry or air dry.
2. Apply a thin layer of Calmoseptine® Ointment to reddened or irritated skin 2-4 times daily, or after each incontinent episode or diaper change to promote comfort, and long lasting protection.

Calmoseptine® Ointment is easily removed with baby oil or mineral oil when necessary.

ACTIVE INGREDIENTS:

- Menthol 0.44% External analgesic / Anti-itch
- Zinc Oxide 20.6% Skin protectant / Anorectal astringent
- Calamine, chlorothymol, glycerin, lanolin, phenol, sodium bicarbonate and thymol in a suitable ointment base

ENCOURAGE BASIC CONCEPTS OF SKIN CARE

- Keep skin clean, moisturized and dry.
- Adequate “pressure relief” for bedridden and wheelchair bound patients.
- Assessment and monitoring of nutritional status by a dietitian.
- Adequate fluid intake (6-8 glasses of water daily).
- Consultation by an ET Nurse (Enterostomal Therapist) or skin specialist.
- Protect yourself and the patient by observing universal blood and body fluid precautions.

WARNING: For external use only. Not for deep or puncture wounds. Avoid contact with eyes. Keep out of reach of children. In case of accidental ingestion contact a physician or poison control center immediately. If condition worsens or does not improve within 7 days, consult a doctor.
