Dear Calmoseptine Inc.,

I have recently discovered your product Calmoseptine ointment. I began to use it around the button of my foster sons G-tube to prevent leakage and infection. It works very well for him and his tummy looks much less red and sore because of the Calmoseptine ointment. I have also been using the ointment on my foster daughters hand. My daughter is profoundly intellectually disabled with many self stimulatory behaviors. She sucks on her right hand all the time leaving it raw. I have had a terrible time with her hand and had resorted to using Bactroban ointment under a leather glove which had to be changed frequently. Still, her hand was often bleeding and infected with eczema and imbintiago. After using Calmoseptine ointment for just a few days , my daughters hand cleared up beautifully. She no longer needs the gloves and her hand has no open sores. I have recommended Calmoseptine ointment to all our doctors and to my personal friends .

Sincerely

Barbara
